Publisher

The Optical Society of America solicits papers that contribute new knowledge or understanding of any optical phenomenon, principle, or method. The Society will not accept papers that report incremental progress or are marginally different from previously published works. The material in each journal is described in a general way by the areas that designate its topical editors. The *Journal of the Optical Society of America B* emphasizes laser spectroscopy and modern quantum optics. Invited review papers will occasionally be published. All papers will be subject to peer review, including invited papers. The *Journal of the Optical Society of America A* emphasizes image science as well as being the general journal for basic material. Authors are encouraged to consider which of the Society's journals are appropriate for their manuscript, including *Applied Optics* and the *Journal of Lightwave Technology*. Any doubts can be resolved by sending the manuscript to the *Journal of the Optical Society of America B* or by contacting one of the editors.

Submit manuscripts by using OSA's submission system at the website <http://www.osa.org/pubs/authors>. Submission is a representation that the manuscript has not been published previously or currently submitted for publication elsewhere. The manuscript should be accompanied by a manuscript submission form and a completed copy of the transfer-of-copyright form, which appear frequently in this journal. This written transfer of copyright is necessary under the U. S. copyright law in order for the Optical Society to continue disseminating research results as widely as possible. The Society continues to maintain low subscription fees to members and libraries in spite of increasing costs. Charges of \$125 per printed page are assessed to help defray production expense. In addition, an overlength publication charge of \$210 per printed page is applicable for each page in excess of ten. Failure to honor the overlength publication charge may prevent publication.

Manuscript Preparation: Complete instructions can be found at <http://www.osa.org/pubs/authors>.

Proofs and all correspondence concerning papers in the process of publication should be addressed to the **Managing Editor, Journal of the Optical Society of America B**, 2010 Massachusetts Avenue, N.W., Washington, D.C. 20036; phone (202) 416-1938. In all correspondence reference should be made to the title, author, and manuscript number. Extensive alterations made in proof will result in assessment of an author's alteration fee.

Copyright © 2006 Optical Society of America. A complete statement of the provisions for copying, quotation, and reproduction appears on the last page of the issue. Address any inquiries to the Director of Publications, Optical Society of America, 2010 Massachusetts Avenue, N.W., Washington, D.C. 20036.

Journal of the Optical Society of America B, 2010 Massachusetts Avenue, N.W., Washington, D.C. 20036; phone (202) 223-8130.

Journal of the Optical Society of America B (ISSN 0740-3224) is published monthly by the Optical Society of America, 2010 Massachusetts Avenue, N.W., Washington, D.C. 20036-1023. CODEN JOBPDE, USPS Publication No. 744-710. Subscription rates (domestic) for 2006 (paper or microfiche) are \$110.00 (print and online) per year for OSA members and \$1760.00 (print only) per year for nonmember and library subscriptions. Periodicals postage paid at Washington, D.C. 20066-9998 and at additional mailing offices. POSTMASTER: Send address changes to *Journal of the Optical Society of America B*, 2010 Massachusetts Avenue, N.W., Washington, D.C. 20036-1023. Subscriptions, missing copies, and changes of address: Optical Society of America, Customer Service, 2010 Massachusetts Avenue, N.W., Washington, D.C. 20036-1023; (202) 416-1907; fax (202) 416-6130. Back-number, single-issue, and foreign rates available on request.

PAPERS

Atomic and Molecular Physics

- Polarization-dependent sensitivity of level-crossing, coherent-population-trapping resonances to stray magnetic fields
Arno Huss, Roland Lammegger, Laurentius Windholz, Emilia Alipieva, Sanka Gateva, Lubomir Petrov, Elena Taskova, and Georgy Todorov 1725

Diffraction and Gratings

- Polarization characteristics of diffracted beams from twisted nematic gratings fabricated by the photoalignment effect in dye-doped liquid-crystal films
Wei-Yen Wu, Ting-Shan Mo, and Andy Ying-Guey Fuh 1737

Fiber Optics and Optical Communications

- Study of optically induced effects due to bending and twisting using the vector finite-element method
Jennifer Dacles-Mariani and Garry Rodrigue 1745

- Design scheme for Mach-Zehnder interferometric coarse wavelength division multiplexing splitters and combiners
Matteo Cherchi 1755

Integrated Optics

- Dispersion characteristics of asymmetric double-negative material slab waveguides
Zhong Yin Xiao and Zi Hua Wang 1757

Lasers and Laser Optics

- Self-consistent real three-dimensional simulation of vertical-cavity surface-emitting lasers
Péter Nyakas, Gábor Varga, Zsolt Puskás, Naoki Hashizume, Tamás Kárpáti, Tamás Veszprémi, and György Zsombok 1761

- Experimental evidence of the validity of the McCumber theory relating emission and absorption for rare-earth glasses
R. M. Martin and R. S. Quimby 1770

OSA[®]

(Contents continued inside)

Gaussian pulse dynamics in gain media with Kerr nonlinearity	<i>Christian Jirauschek and Franz X. Kärtner</i>	1776
Nonlinear dynamics of a modulated bidirectional solid-state ring laser	<i>Fuad Rawwagah and Surendra Singh</i>	1785
Observation of whispering-gallery and directional resonant laser emission in ellipsoidal microcavities	<i>Liangmin Zhang, You-Xiong Wang, Fajian Zhang, and Richard O. Claus</i>	1793
Physical Optics		
Explicit computation of gradient and nongradient contributions to optical forces in the discrete-dipole approximation	<i>Vance Wong and Mark A. Ratner</i>	1801
Materials		
Behavior of 157 nm excimer-laser-induced refractive index changes in silica	<i>Charlene M. Smith and Nicholas F. Borrelli</i>	1815
Generation of terahertz pulses through optical rectification in organic DAST crystals: theory and experiment	<i>Arno Schneider, Max Neis, Marcel Stillhart, Blanca Ruiz, Rizwan U. A. Khan, and Peter Günter</i>	1822
Optical properties of a nearly ferroelectric superconductor	<i>Chien-Jang Wu and Wen-Kai Kuo</i>	1836
Modeling of a biased liquid-crystal capillary waveguide	<i>Jesper Lægsgaard</i>	1843
Preparation and optical properties of trivalent europium-doped bulk and nanocrystalline SrY_2O_4	<i>Zuoling Fu, Shihong Zhou, and Siyuan Zhang</i>	1852
Optical reflection response of dye-aggregate films in the absorption bands	<i>Takashi Wakamatsu, Susumu Toyoshima, and Kazuhiro Saito</i>	1859
Photorefractive properties probed by Raman spectroscopy in Fe-doped LiNbO_3	<i>R. Mouras, M. D. Fontana, M. Mostefa, and P. Bourson</i>	1867
Nonlinear Optics		
Generalized optical transfer-matrix technique: application to the nonlinear response of multiple quantum wells	<i>Vladimir G. Avramenko</i>	1872
Soliton self-frequency shift with diffraction-suppressed wavelength variance and timing jitter	<i>Evgenii E. Serebryannikov and Aleksei M. Zheltikov</i>	1882
Bose-Hubbard model on a ring: analytical results in a strong interaction limit and incommensurate filling	<i>Ying Wu and Xiaoxue Yang</i>	1888
Generalized theoretical treatment and numerical method of time-resolved radially dependent laser pulses interacting with multiphoton absorbers	<i>Evgueni Parilov and M. J. Potasek</i>	1894

Journal of the Optical Society of America

The *Journal of the Optical Society of America* is a peer-reviewed scientific journal of optics, published by The Optical Society.^[1] It was established in 1917^[2] and in 1984 was split into two parts, A and B.

Contents

[Journal of the Optical Society of America A](#)

[Journal of the Optical Society of America B](#)

[References](#)

[External links](#)

Journal of the Optical Society of America A

Part A covers various topics in optics, vision, and image science. The editor-in-chief is P. Scott Carney (University of Rochester Institute of Optics).

Journal of the Optical Society of America B

Part B covers various topics in the field of optical physics, such as guided waves, laser spectroscopy, nonlinear optics, quantum optics, lasers, organic and polymer materials for optics, and ultrafast phenomena. The editor-in-chief is Kurt Busch (Humboldt University of Berlin, Germany).
